**Evaluation time calculation:**

(TCH) x (class size) x (factor) = attributed evaluation hours

**Calculation**

$$(E\% \times C1) + (R\% \times C2) + (I\% \times C3) = EF.$$

So complex 50/25/25 evaluation would be

$$(50\% \times 0.03) + (25\% \times 0.015) + (25\% \times 0.0092) = 0.02105$$
